

PRESS RELEASE

LPA and CubeMatch announce strategic partnership to strengthen operational efficiency and data governance in asset management

Frankfurt / Dublin, 23rd February 2026

LPA and CubeMatch have formed a strategic partnership combining regulatory data expertise with process optimisation and digital transformation capabilities. Together, they will support Asset Managers and Fund Administrators in building more efficient, transparent, and data-driven operating models.

LPA brings deep experience in regulatory reporting and data management across regimes including AIFMD, PRIIPs, MiFID and Solvency II, delivered through its Capmatix platform, which handles complex, high-volume regulatory datasets. CubeMatch complements this with expertise in strategic change, digitalisation, data intelligence and AI capabilities, supported by proprietary tooling with optimisation tools such as CubeMatch Pulse.

The partnership responds to increasing cost pressure, regulatory complexity, and rising expectations around data quality, resilience, and transparency across the asset management industry. The joint offering aims to help move beyond incremental fixes towards structurally stronger operating models.

Keith O'Brien (LPA)

“Across the asset management industry, the focus is increasingly shifting from meeting regulatory requirements towards making better use of regulatory and operational data. Our objective is to support firms in strengthening their operating models while maintaining compliance.

We are pleased to establish a partnership with CubeMatch and look forward to working together to help asset managers and fund administrators improve operational efficiency and data governance in a sustainable way.”

Leslie Duckett (CubeMatch)

“We are delighted to partner with LPA to support the modernisation and resilience of operating models across asset management and fund administration. Together, we aim to drive efficiency, streamline processes, and reinforce compliance as industry demands evolve.”

About LPA Group

Lucht Probst Associates (LPA) provides automation, digitalisation, and data-driven documentation solutions for the asset management and capital markets industry. LPA supports asset managers, banks, and fund administrators across regulatory and distribution processes for structured products, OTC derivatives, and funds. Its software platform, Capmatix, is used by more than 200 financial institutions worldwide to support regulatory reporting, improve data quality, and address evolving regulatory requirements.

About CubeMatch

CubeMatch is a global change and transformation consultancy specialising in financial services. With offices across Europe and Asia, CubeMatch supports clients in strategic change, digital transformation, regulatory compliance, data and AI, and managed services delivery.
